Fund Objective

The BMA Chundrigar Road Savings Fund seeks to provide its investors with an attractive rate of return by investing in all fixed income and money market instruments of medium risk and short duration. The fund will seek to maintain a rupee weighted average maturity for the investment portfolio of not more than 5 years.

Fund Commentary

In the Month of Sept'16, the fund posted an annualized return of 4.74% against the benchmark return of 6.35%, underperformed the benchmark by 1.61%. In 1QFY17, fund posted a return of 5.03%. The current allocation of the fund is as follows: 42.41% invested in Cash, 20.36% invested in PIBs, 28.69% placed with Banks as TDRs, 1.35% invested in TFC / Sukuk, 5.43% in Spread Transaction, 1.17% in Tbills and 0.60% was held as accruals. Portfolio and benchmark standard deviations were 0.02% and 0.68% respectively. Portfolio duration was at 452 days while the weighted average maturity was at 475 days. Based on the recent developments at macro front, we are in process to rebalance BCSF portfolio to enhance performance of BCSF.

Portfolio Ratings Profile

Economic Outlook

CPI for Sept'16 clocked in at 3.88% against the CPI of 3.56% for Aug'16. The CPI increased by 0.20% MoM in Sept'16 as compared to a decrease of 0.30% in Aug'16. Monthly inflation is attributable to 0.17% MoM rise in food inflation where prices of perishable food items have risen again by 1.97% MoM after falling by 6.85% MoM in previous month. Among other major contributors to monthly inflation included an unexpected rise in education index (+2.38% MoM) and health index (+1.36% MoM). The average inflation in the first quarter of FY17 stood at 3.86% as against 1.66% in the same period last year. We are expecting CPI of 4.5% in FY17.

The State Bank of Pakistan (SBP) maintained its cautionary stance by keeping the policy rate unchanged at 5.75% for next two months. Subdued global growth outlook, uncertainty in oil prices, and increasing uncertainty on international financial and commodity markets due to slowdown in the Chinese economy and Brexit support this cautionary stance.

A sharp widening in the current account deficit was recorded during Aug'16 which stood at US\$ 721mn, depicting 21% MoM increase due to higher imports which increased by 26% MoM. The current account deficit for 2MFY17 stood at US\$ 1,316mn against the deficit of US\$ 686mn for the same period last year. We expect a further deterioration in the country's current account balance after the completion of IMF program and potential reversal in international commodity prices.

The country's foreign exchange reserves increased to US\$ 23.42bn as on 23th September, 2016, primarily due to the inflow of \$700 million from China Development Bank. Pak rupee traded within a narrow band and appreciated slightly against the dollar.

In the PIB auction held during the month; bids worth Rs.295.81 billion were received against the target of Rs.100 billion and the maturity of Rs.49.13 billion. The cut-off yields for 3 years, 5 years and 10 years tenor arrived at 6.20%, 6.70% and 7.80% respectively, while no bids were received in 20 years tenor.

Name of non-compliant investment	Type of Investment	Value of investment before provision	Provision held if any	Value of investment after provision	Percentage (%) of Net Assets	Percentage (%) of Gross Asset
U Micro Finance Bank	TDR	60,000,000.00	NIL	60,000,000.00	14.33%	13.92%
Finca Micro Finance Bank	TDR	60,000,000.00	NIL	60,000,000.00	14.33%	13.92%

Disclosure: The scheme has maintained provisions against Workers' Welfare Fund (WWF) liability to the tune of Rs. 142,576 as of Jun 30, 2015. Had the provision not been made, the NAV per unit/percentage return of the Fund would be higher by Rs. 0.003/0.03%. Details are specified at note 11.1 to the latest period ended report of Jun 2016. Performance data does not include the cost incurred directly by an investor in the form of sales load etc. Effective from July 1, 2015 no provision is being made as mutual funds have been excluded from levy of WWF vide Finance Act 2015.
